HARDY PORTFOLIOS

About the Hardy Managed Portfolios

The investment objective is to grow the capital value of the portfolio as well as to generate a degree of income. The Casterbridge Growth Strategy may be suitable for an investor with a time horizon of more than 5 years, and a medium-high tolerance for risk.

The Casterbridge Growth Strategy is a diversified portfolio, the largest asset allocation being to domestic and international equities as well as fixed income. There is an allocation to “alternative investments” such as commercial property, private equity, commodities and absolute return strategies.

Performance Information

This factsheet illustrates the holdings and performance returns for our Hardy Performance Reporting Models which we deem to be the most accurate representation of our investment decisions. The funds held and in turn, the performance, on specific platforms may vary due to fund and share class availability. Please contact us should you require more information. The performance figures, accurate as at 7th October 2024, are calculated using Morningstar Direct and provided for illustrative purposes only and should not be viewed as the performance of a specific client account. All performance figures on this factsheet assume income is reinvested and are shown net of underlying fund charges. The methodology of calculating underlying costs of investments varies between fund houses making coherent reporting prohibitive. Casterbridge Wealth’s management fees and any charges and fees applied by the platform and Professional Advisers will be charged in addition. Deduction of these fees would have reduced the performance shown. Both the Yield and Ongoing Charges Figure (OCF) for each strategy are calculated on a periodic basis using a weighted average of the latest Morningstar data available for the underlying investments as at the date of the factsheet.

Important Information

The Portfolio Positioning above reflects the asset allocation new investors would receive but may not equal 100% due to rounding. Existing investors' portfolios may drift subject to market movements in between rebalances. The periodic rebalances resets the portfolio position for all investors.

The value of investments, and income from them, can go down as well as up and may be affected by exchange rate variations. You may not recover what you invest.
