

Casterbridge

Hardy Managed Portfolio Balanced

AS AT 30 SEPTEMBER 2025

About the Hardy Managed Portfolios

The investment objective is to grow the capital value of the portfolio as well as to generate a degree of income. The Casterbridge Hardy Balanced Strategy may be suitable for investors with a medium appetite for risk and should be held for 5 years or more.

The Casterbridge Hardy Balanced Strategy is a diversified portfolio with allocations to domestic and international equities, fixed income, and 'alternative investments'. The allocation to 'alternative investments' includes assets such as commercial property, private equity, commodities, and absolute return strategies.

We created Casterbridge because we felt people deserve proudly independent, adaptive, and agile investment management. With extensive industry expertise and a passion for delivering better outcomes, we developed a discretionary fund management service that offers greater choice, flexibility, and a more personalised approach.

Performance Information

This factsheet illustrates the holdings and performance returns for our Hardy Performance Reporting Models which we deem to be the most accurate representation of our investment decisions. The funds held and in turn, the performance, on specific platforms may vary due to fund and share class availability. Please contact us should you require more information. The performance figures are calculated using Morningstar Direct and provided for illustrative purposes only and should not be viewed as the performance of a specific client account. All performance figures on this factsheet assume income is reinvested and are shown net of underlying fund charges. The methodology of calculating underlying costs of investments varies between fund houses making coherent reporting prohibitive. Casterbridge Wealth's management fees and any charges and fees applied by the platform and Professional Advisers will be charged in addition. Deduction of these fees would have reduced the performance shown. Both the Yield and Ongoing Charges Figure (OCF) for each strategy are calculated on a periodic basis using a weighted average of the latest Morningstar data available for the underlying investments as at the date of the factsheet.

Please note that the performance data contained within this file is accurate as at 07 October 2025.

Important Information

The Portfolio Positioning on page 4 reflects the asset allocation new investors would receive but may not equal 100% due to rounding. Existing investors' portfolios may drift subject to market movements in between rebalances. The periodic rebalances resets the portfolio position for all investors. The value of investments, and income from them, can go down as well as up and may be affected by exchange rate variations. You may not recover what you invest. This document has been prepared for information purposes only and does not constitute advice or a personal recommendation, nor does it constitute an invitation to purchase units or shares. It does not purport to be a complete description of our investment policy, the financial markets or any securities referred to in the material, and should be read in conjunction with 'Our Services and Business Terms', copies of which are available upon request. Investments or investment services referred to may not be suitable for all recipients, as the suitability of a particular strategy will depend on an investor's individual circumstances and objectives.
